

Sleep and respiratory medical devices.

Experience the difference with BOC sleep therapy

A local partner in leading sleep innovations

Our sleepcare team are here to provide you with a leading selection of independent sleep solutions.

Professional training

Comprehensive training is provided by our sleep specialised channel managers to ensure the best outcomes for our partners and their prospective patients. Training includes sleep diagnostics, CPAP therapy treatment and ongoing support and after care.

Optimum cost of ownership

Take advantage of our global network, which allows us to offer world-leading products and negotiate better pricing, enabling us to provide cost effective solutions.

Ethical responsibility

We source our sleep and respiratory devices from carefully selected manufacturers that share our commitment to ethical practice, environmental efficiency, human rights and fair treatment of employees.

Reliable service

Rely on our experienced local customer service team to provide all sales, training, maintenance and servicing support.

APAP (Automatic positive airway pressure) device:

Delivers an automatic pressure self-adjusting to patient requirements throughout therapy

CPAP (Continuous positive airway pressure) device:

Delivers a fixed pressure throughout therapy

ResMed AirSense™ 10 device series

ResMed's sleep therapy devices feature a selection of cutting-edge technologies, each designed to help make your treatment experience as easy and comfortable as possible. Featuring ResMed's latest technology, the AirSense™ 10 series offers you a new beginning in great sleep.

AirSense™ 10 AutoSet™

The AirSense™ 10 AutoSet™ is ResMed's premium auto-adjusting pressure device; the pressure adjusts on a breath-by-breath basis to suit your personal breathing needs throughout the night. Additional features include:

- The enhanced AutoSet™ algorithm
- The AutoSet™ response feature for additional comfort

AirSense™ 10 Elite

The AirSense™ 10 Elite is ResMed's premium fixed pressure therapy device with the ability to precisely adjust within the pressure range of 4–20cm H₂O.

AirSense™ 10 AutoSet™ for Her

Research shows that sleep apnoea in women is different to sleep apnoea in men. So it makes sense that their treatment should be different too. ResMed has created the AirSense™ 10 AutoSet™ for Her therapy device with an algorithm designed to respond to female-specific characteristics of sleep apnoea.

Features and benefits

- Built-in wireless connectivity¹
- Easy-breathe motor
- HumidAir™ heated humidifier
- CSA and CSR detection
- Packed with a ClimateLineAir™ heated tube
- Expiratory pressure relief
- Climate control and climate control auto
- Intuitive user interface
- AutoRamp™ with sleep onset detection

¹ Wireless communication depends on network availability.

ResMed AirMini™

AirMini™ – the world's smallest CPAP device is suitable for use at home or while you're away. Its small size and portability means you'll never have to choose between therapy performance and freedom again.

AirMini™ app

ResMed's AirMini™ app lets you control your AirMini™ using selected smart devices. Simply download the app, connect via bluetooth and enjoy access to a range of comfort settings that may help you get a restful night's sleep. The AirMini™ app also provides you with your 30-day therapy history and daily sleep score each morning, so you can track your progress and schedule goals for greater success.

AirMini™ accessories

Travel bag and case

Take your sleep therapy wherever you go with the AirMini™ travel bag and case. Small and compact, the travel bag fits the whole system to keep everything together, while the travel case snugly holds the device to provide protection against daily knocks and spills.

DC-DC converter

Operate your AirMini™ from a vehicle cigarette lighter socket (12V or 24V DC power source) in a car, boat, or other vehicle equipped with a suitable battery so that you can enjoy your sleep therapy on your travels.

Features and benefits

- All three therapy modes; AutoSet™, AutoSet™ for Her and CPAP
- Waterless humidification with HumidX™ for portable convenience¹
- AutoRamp™ with sleep onset detection
- Expiratory pressure relief
- Convenient one button operation, with additional therapy control directly from your smart device via the AirMini™ app
- Designed to work with ResMed's latest AirFit™ F30, AirTouch™ F20, AirFit™ 20 series and AirFit™ P10 for AirMini™ masks

Two-year warranty

1 Currently for nasal and pillows mask users.

Philips DreamStation™

Philips DreamStation™ offers a sleek, low-profile design. Its vibrant colour screen displays daily progress and features easy-to-use menus.

Dreamstation's top-mounted humidifier hose swivel and front-facing display make it easy for patients to operate while lying down or sitting up in bed. In addition, it's small and light, making it easy to pack for travel.

Features and benefits

- Integrated bluetooth connects with DreamMapper
- EZ-Start: personalised adjustments to positive airway pressure over the first 30 days
- SmartRamp allows users to fall asleep to lower pressures than standard ramp mode
- Heated tube included
- Detachable humidifier

Transcend 365 miniCPAP™ Auto

Full-size features in a travel-size CPAP.

Transcend 365 miniCPAP™ takes portable CPAP to a new dimension by introducing an incredibly small, truly portable, and unique heated humidifier. Now your patients can enjoy all the features and benefits of the CPAP they've come to rely on at home in a package that's perfect for traveling.

This smart humidifier detects user's breathing to deliver warm, moist air only when they inhale so they get the comfort they need when they need it. This intelligent humidification system makes the Transcend 365 miniCPAP™ much smaller and lighter than other CPAP or humidifier systems. It uses about half the water of a standard heated humidifier and much less energy.

TRANSCEND®
minicpap™
THERAPY WITHOUT LIMITS

Features and benefits

Lumin® CPAP sanitiser

Disinfect your CPAP equipment. Your healthy choice in CPAP and accessory sanitiser with a simple one-touch operation.

Lumin operates with a unique specialised high power UV-C light source, that is targeted at the narrow range of light that is proven to kill harmful bacteria, viruses, mould and fungus (254nm). This is the same type of light source that is used in hospital operating rooms and sterile clean rooms.

Features and benefits

- Ambient UV light
- One touch five minute sanitisation
- No harmful chemicals or gases
- Easy access tray
- Cost effective
- The safe UVC light process is suitable for items such as:
 - CPAP equipment
 - Tooth brush
 - Hearing aids
 - Mobile phones
 - Children's pacifiers
 - Sport mouth guards
 - Shaving devices
 - Toys

Aerosol therapy

Aerosol therapy is widely recognised as an effective medical treatment for a range of pathologies of the respiratory tract.

BOC understands that the quality of aerosol treatment depends on median particle size (MMAD), the Fine Particle Fraction (FPF) and how quickly a device can break down medication into breathable particles. That's why BOC provides Italian-made Flaem nebulisers which are independently tested by the TUV Rheinland labs in Germany certifying the MMAD and FPF values specified in this document, so you can rest assured that your patients are receiving effective, high quality aerosol therapy.

NebulAir+ nebuliser compressor system

For continuous use at home or in a medical setting, this heavy-duty aerosol therapy compressor is designed to deliver outstanding performance and flexibility, perfect for demanding applications.

Features and benefits

- Supports multiple treatments per day with 8ml cup capacity
- 2.21 μm MMAD¹
- 84.2% FPF²
- Weighs 2.4 kg
- Dimension (cm) is 20(L) x 30(W) x 10(H)
- Produces up to 14 L/min of flow rate
- Features a carry handle and consumables compartment with transparent lid for maximum compliance
- Includes RF7+ nebuliser bowl, mouthpiece, a set of adult and paediatric masks, 2m tubing and a pack of two air filters

Ordering information

Description	Part number
Flaem NebulAir+ system	EL40P00

Spare accessories

Description	Part number
Adult patient pack	AC0559P
Paediatric patient pack	AC0548P

Baby mask up to one month	AC0389P
Baby mask one to eleven months	AC0390P
Baby mask one to three years	AC0391P
Paediatric duck clip set	AC0580P
Easy insertion tubing 2m	AC0578P
Filter Flaem NebulAir+ pack of two	AC0164P

NebulAir+ nebuliser system

¹ Mass Median Aerodynamic Diameter of the particles. Tested and certified by TUV Rheinland LGA products GmbH in Germany in accordance with the European standard EN 13544-1 for nebulising systems.

² Fine Particle Fraction; percentage of particles smaller than 5 μm . Tested and certified by TUV Rheinland LGA products GmbH in Germany in accordance with the European standard EN 13544-1 for nebulising systems.

RespirAir nebuliser compressor system

For comfortable, at-home treatment, the RespirAir is a lightweight yet powerful nebuliser compressor designed for quick and effective treatment.

RespirAir nebuliser system

Features and benefits

- Supports multiple treatments per day with 8ml cup capacity
- 2.53 µm MMAD¹
- 79.6% FPF²
- Weighs 1.45 kg
- Dimension (cm) is 16(L) x 16(W) x 10(H)
- Produces up to 10 L/min of flow rate
- High quality ABS polymer finish allows easy cleaning
- Ergonomic handle and slot to hold medication chamber
- Comes with RF7+ nebuliser bowl, mouthpiece, a set of adult and paediatric masks, 1m tubing and a soft carry bag

Smarty portable nebuliser

A compact and quiet hand-held nebuliser perfect for use at home or when travelling.

Its advanced vibrating mesh technology effectively nebulises most prescribed medication. This portable nebuliser is conveniently powered by two AA alkaline or rechargeable batteries.

Smarty portable nebuliser

Features and benefits

- Supports two treatments per day with 8ml cup capacity
- 4 µm MMAD¹
- 65% FPF²
- Weighs 130 g
- The "on demand" function allows for efficient use of the medication
- Easy to clean with a dishwasher safe medication chamber and mouthpiece
- Comes with a silicone mouthpiece, a set of adult and paediatric masks, a soft carry bag and two AA alkaline batteries

Nebuliser selection guide

The following table provides a quick reference guide you can use to assist your patients to make a selection.

	NebulAir+	RespirAir	Smarty
Treatment time ¹ (minutes)	4	5	10
Frequency (treatments per day)	Multiple	Multiple	2
Medication			
Salbutamol	✓	✓	✓
Ipratropium bromide	✓	✓	✓
Budesonide	✓	✓	✓
Sodium chloride (0.9%)	✓	✓	✓
Hypertonic saline (7%)	✓	✓	✓
Dornase alfa	✓	✓	✓
Tobramycin	✓	✓	✓
Colistimethate sodium	✓	✓	✗

¹ Data shown is in accordance with Flaem Nuova internal procedures tested for 2.5ml medication charge. Values shown for the aerosol delivery may vary depending on the patients' respiratory capacity.

RF7+ nebuliser bowl

The Flaem RF7+ is a dual-speed nebuliser with an innovative speed selector that allows your patients to easily choose between faster therapy or maximum medication delivery.

Flaem RF7+
nebuliser with
mouthpiece

Flaem RF7+
nebuliser paediatric
duck clip

Features and benefits

- Can be used with any standard aerosol therapy compressor or compressed medical gas source
- Provides consistent particle sizes
- Features a speed selector valve to choose between faster therapy or maximum medication delivery
- Reusable and can be disinfected in electrolytic oxidising chlorine solutions or autoclaved
- Paediatric option available with a duck clip design for young children

RF6+ nebuliser

This high efficiency nebuliser is equipped with an anti-dispersion filter to minimise the distribution of exhaled medication in the immediate environment.

Flaem RF6+
nebuliser with
anti dispersion filter

Features and benefits

- Can be used with any standard aerosol therapy compressor or compressed medical gas source
- Anti-dispersion filter
- Reusable and can be disinfected in electrolytic oxidising chlorine solutions or autoclaved
- The filters are single patient use and available for purchase in packs of 10

Monitoring devices

Personal Best peak flowmeter

Personal Best helps healthcare professionals monitor their patients' condition by providing accurate and instant airflow measurements.

Features and benefits

- Comfortable oval mouth piece
- Built-in, adjustable three zone asthma management system
- Easy-to-read scale
- Unique fold-out handle for easy grip

Ordering information

Description	Part number
Philips Personal Best peak flowmeter	1050365

Personal Best

A340 finger pulse oximeter

A reliable finger pulse oximeter which measures the arterial oxygen saturation (peripheral capillary oxygen saturation) SPO2, and pulse rate.

Features and benefits

- Oxygen saturation reading (SPO2)
- Pulse rate measurement
- OLED colour display with 6 different orientation settings
- Not suitable for children under five years

Ordering information

Description	Part number
Finger pulse oximeter Aeon A340 white	A340-W

pulse oximeter

Pulmonary rehabilitation

Respironics Threshold PEP

When patients exhale through Threshold PEP, the resistive load creates positive pressure that helps open the airways and allows mucus to be expelled during 'huff' coughing, or Forced Expiratory Technique (FET).

Features and benefits

- Improves mobilisation and prevents accumulation of secretions
- Promotes effective breathing patterns and improves gas exchange
- Improves central and peripheral airway function
- Prevents or reverses atelectasis
- Optimises bronchodilation when combined with aerosol therapy

Ordering information

Description	Part number
Respironics Threshold PEP	HS735

Respironics Threshold IMT

This Inspiratory Muscle Trainer is designed to help patients improve their respiratory muscle strength. When patients inhale through Threshold IMT, a spring-loaded valve provides a resistance that exercises respiratory muscles through conditioning.

Features and benefits

- Increases respiratory muscle strength
- Increases respiratory muscle endurance
- Increases exercise tolerance

Ordering information

Description	Part number
Respironics Threshold IMT	HS730

Respironics Threshold
PEP and IMT

Supplemental oxygen therapy

Supplemental oxygen therapy is prescribed to treat and manage a variety of respiratory conditions including the Chronic Obstructive Pulmonary Disease (COPD). BOC is the leading supplier of medical gases into the Australian healthcare sector and has served the needs of patients at home for decades.

As well as providing medical oxygen in cylinders, BOC provides electric powered oxygen concentrators for patients who require long term oxygen therapy at home. Oxygen concentrators are also available in light weight portable models making it easier for patients to carry around outside their homes.

Stationary oxygen concentrator

For patients who need oxygen therapy at home, BOC provides electric powered floor standing machines suitable for prescriptions of up to 10 L/min. BOC offers a standard and a high flow stationary oxygen concentrator that can be used with up to 15 metres of oxygen tubing for easy movement around home.

Features and benefits

- Long term oxygen therapy at home
- Usable with up to 15m of oxygen tubing for easy movement

BOC offers two models based on patient's clinical demand:

- Philips Everflo™ produces up to 5 L/min of oxygen
- Caire NewLife™ Intensity™ 10 produces up to 10 L/min of oxygen

Ordering information

Description	Part number
Philips Everflo™ stationary oxygen concentrator 5 L/min	1039370
Caire NewLife™ Intensity™ 10 stationary oxygen concentrator 10 L/min	AS099-211

Philips Everflo™ stationary oxygen concentrator 5 L/min

Caire NewLife™ Intensity™ 10 stationary oxygen concentrator 10 L/min

Portable oxygen concentrators

For patients who require portable oxygen concentrators, BOC offers a range including continuous flow and pulse dose models.

Pulse dose oxygen concentrators provide oxygen in bolus doses triggered by the inspiratory effort of the patient. By providing oxygen only during inhalation they are able to keep the patients saturated with a lower volume of oxygen produced. These light machines can produce enough oxygen to suit the needs of most patients on prescriptions of up to 2 L/min. These devices have a range of settings which set the size of the bolus dose. These settings are not relevant to the continuous flow rates, e.g. setting 2 does not mean 2 L/min.

Features and benefits

BOC offers three models to best meet your patients' needs:

Philips SimplyGo™

- Produces up to 2 L/min of continuous flow
- Six settings of pulse dose
- Comes with carry cart

Inogen One™ G5™

- Six settings of pulse dose
- Intelligent pulse delivery adopts to patient breathing cycle

Caire FreeStyle™ Comfort™

- Five settings of pulse dose
- AutoSAT™ technology responds to patient's breathing pace and cycle
- Ergonomic shape rests against the body curves

Ordering information

Description	Part number
Philips SimplyGo™ with carry cart	1069058
Inogen One™ G5™ with standard battery	IS-500-AU8
Inogen One™ G5™ with extended battery	IS-500-AU16
Caire FreeStyle™ Comfort™ with standard battery	AS200-2
Caire FreeStyle™ Comfort™ with extended battery	AS200-102

Titration of pulse dose oxygen concentrators

A patient wanting to use a pulse dose device needs to be titrated by their respiratory care provider and obtain a pulse dose prescription specific to the device they use. Titration involves use of an oxygen pulse oximeter to measure arterial oxygen saturation under different levels of physical activity to determine the appropriate pulse setting. BOC may be able to provide rental devices for patients to use for titration before they make a purchase.

Pulse dose concentrators are not suitable for mouth breathers and not recommended for nocturnal oxygen therapy as they may fail to sense the shallow breath while sleeping.

Oxygen concentrators onboard a plane

When onboard an aircraft, the altitude may cause arterial oxygen saturation to drop and the concentrator may need to be used at a higher setting. Patients must discuss this with their doctor and get a prescription for flying.

We advise that the airline is contacted about using an oxygen concentrator on board to seek their approvals and arrange a seat with power outlet.

Oxygen concentrator selection guide

Oxygen therapy masks and consumables

For decades, BOC has been listening to patients who require medical oxygen for home use to determine what they need to make their therapy more comfortable. BOC offers a range of oxygen therapy consumables carefully selected to provide maximum comfort for patients who are on oxygen therapy for long periods.

Medical suction

Aspira go 30 portable suction

A portable suction suitable for use in a medical setting or at home for pharyngeal and tracheal suctioning. This Italian device has a patented regulator capable of adjusting suction pressure to meet patient's therapy requirements.

FLAEM®
Aspira go 30
suction unit

Features and benefits

- High flow rates 30 L/min for fast removal of secretions
- Adjustable suction power -75 to -637 mmHg; control the pressure as per therapy guidelines
- Suitable for use on patients with tracheotomy
- Lightweight with optional disposable apparatus
- Comes with lithium-Ion battery, AC adapter, power cord, DC car charger, reusable canister, a pack of connection tubing, bacterial filter and a manual flow control

 **Three-year warranty.**
 **Six-month battery warranty**
