Speedglas™

3M Speedglas G5-01 Heavy-Duty Welding Helmets with Adflo PAPR

- Extra-large flip up grinding visor (170 x 104 mm)
- True-View optics for improved colour and contrast
- Extra-large welding lens viewing area (71 x 108 mm)
- Airflow climate control
- Optional head/neck protection and task light
- Heavy-duty Adflo PAPR for 12 hrs protection (RMPF 50)

Speedglas G5-01TW

- Extra bright light state 2.5 (2.5/5, 8-13)

Part No. AWS617820BONUS

\$2,040⁰⁰

Speedglas G5-01VC

- Variable colour tones in the dark state (natural, cool, warm)
- Extra dark shade 14 for heavy-duty welding (3/5, 8-14)

Part No. AWS617830BONUS

\$2,230⁰⁰

Nederman

Nederman 860 Carriable On-Gun Fume Extraction

- AS/NZS ISO 21904 compliant (W3 certified)
- Translas gun captures up to 98% of fume at the source
- Portable and easy to carry extraction unit (16 kg)
- Single phase power
- 'No-Touch' fume disposal
- High efficiency nanofiber filter (99.7% efficiency)
- Available as a 250 or 400 Amp fume torch kit

250A Part No. FPS250S

\$4,950⁰⁰

400A Part No. FPS400S

\$5,100⁰⁰

NEW AS/NZS ISO 21904 STANDARD RAISES THE BAR.

Launched in March 2026, the AS/NZS ISO 21904 series sets a new benchmark for welding fume extraction – especially where air is recirculated in workshops.

These standards go beyond filter ratings, measuring the performance of the entire system to ensure real-world protection.

W3 is the gold standard – delivering a minimum 99% filtration efficiency.

Because even the best filter means nothing if fumes are leaking back into your workspace.

AS/NZS ISO 21904 also raises the bar on fume capture, with strict requirements for hoods, extraction torches, and low-flow alarms – targeting the biggest risk: poor capture at the source.

Better capture and filtration. Safer workshops.

Nederman GoMax Portable On-Gun Fume Extraction System

- AS/NZS ISO 21904 compliant (W3 certified)
- Translas gun captures up to 98% of fume at the source
- Automatic self-cleaning filter
- Single phase power
- Dual torch outlets support 1-2 welders
- Intelligent set-and-forget flow control
- Available as a 250, 400 or 500 Amp fume torch kit

PLYMOVENT®

Plymovent Portable LEV Fume Extraction Systems

Disposable Filter

Part No. AWSPLYDF11

The Plymovent Disposable Filter Fume Extraction System is a compact single-phase unit suitable for use in light welding fume environments.

- AS/NZS ISO 21904 compliant (W3 certified)
- Single phase power
- Two-stage disposable filter for longer life
- High-quality metal extraction arm (3m)

\$4,210⁰⁰

Self-Cleaning Filter

Built for professional welders, the Plymovent Self-Cleaning Single Phase Mobile Extraction System is suitable for all welding applications including Stick, MIG, TIG, and FCAW.

Available as a single arm or dual arm system.

- AS/NZS ISO 21904 compliant (W3 certified)
- Single phase power
- Self-cleaning
- 1 or 2 high-quality metal extraction arms (3m)
- Super quiet to run

Part No. AWSPLYSC11

SPATA Professional Welding Jacket

Part No. AWS954201 – AWS954205

- High-quality split cowhide leather sleeves
- 520 gr/m² flame retardant cotton on the front
- 305 gr/m² flame retardant cotton on the back
- Two internal pockets
- Complies with ISO Standard 11611
- Sizes M – XXXL

\$125⁰⁰

SPATA Leather Welding Jacket

Part No. AWS954301 – AWS954305

- High-quality split cowhide leather
- Kevlar reinforced seams
- Velcro adjustment cuffs
- Rear opening for safety harness lanyard
- Sleeve pocket
- Complies with ISO Standard 11611
- Sizes M – XXXL

3M Versaflo M-Series High Impact Face Shields with Adflo PAPER

The 3M M-Series Clear Visors with the 3M Adflo Powered Air Purifying Respirator are lightweight, compact and well-balanced, offering integrated face and respiratory protection with optional head and hearing protection.

PLUS: 3M M-Series Face Shields use the same respiratory spare parts as the Speedglas powered air welding helmets.

3M Versaflo M-207 Face Shield with Adflo PAPER

Part No. AWS890207

- High impact face shield (AS/NZS 1337.1) with chemical and scratch-resistant lens
- Flame resistant face seal
- Optional hearing protection
- 8 hours of respiratory protection (RMPF 50)

\$1,810⁰⁰

3M Versaflo M-307 Face Shield & Safety Helmet with Adflo PAPER

Part No. AWS890307

- Integrated safety helmet
- High impact face shield (AS/NZS 1337.1) with chemical and scratch-resistant lens
- Flame resistant face seal
- Optional hearing protection
- 8 hours of respiratory protection (RMPF 50)

\$1,875⁰⁰

NEW 2026 Welding Fume Exposure Regulations Changes

Australia is entering a new era of welding fume control. The shift to stricter Workplace Exposure Limits and the introduction of new AS/NZS standards for fume extraction equipment represents one of the most significant periods of change the welding industry has seen.

These changes will require every workplace – large or small – to reassess how welding fume is managed, how equipment is selected, and how worker protection is verified.

As of March 2026, Australia and New Zealand have a new standard for welding fume extraction equipment. The ISO 21904 international standards have been adopted in Australia and New Zealand and published as our own standard – AS/NZS ISO 21904 Series. These changes have important implications for equipment selection, compliance, and worker health.

In December 2026, we'll see further changes. Australia is replacing Workplace Exposure Standards (WES) with Workplace Exposure Limits (WEL), a framework aligned with more current global occupational exposure limits.

The shift from WES to WEL is far more than a name change. It represents a major update of allowable exposure levels, with the majority of those updated being reduced. Many of the exposure limits for the individual components potentially found within welding fume are dropping significantly. These changes will have a major impact on compliance requirements for Australian workplaces.

**Learn more about
these changes and
how we can help here!**
