Work smarter. Weld better.

COBOTS for repetitive welds so you can focus on high-volume work.

Features

- Linde’s LANCER COBOT (collaborative robot) Features:
- UR10e universal cobot
 - Programmable by pendant or by hand
 - 60 in. x 48 in. work area with 5/8 in peg hole compatibility
 - Linear, circular and weave weld motion
 - 2 in. x 2in. grid CNC precision, hole diameter 0.625 (5/8) in.
 - 500 amp BINZEL® air-cooled welding torch
 - Ready integration for Miller® Auto Deltaweld® welding machines
 - Ready integration for HYPERTHERM® POWERMAX® cutting systems
 - Suitable for welding mild steel, stainless steel and aluminum*

*COBOT does not come ready to weld aluminium, requires an optional package.

Simple and Intuitive Software

- Simple program controls
- Move the cobot using the pendant or by hand
- Arc-on/arc-off function enabling users to operate without welding
- Gas purge/jog wire functions
- Tack weld function
- Short arc or pulse welding capable
- Wire speed and voltage controls for easy weld adjustments

ProStar™
By Linde

PROSTAR™ COBOTS

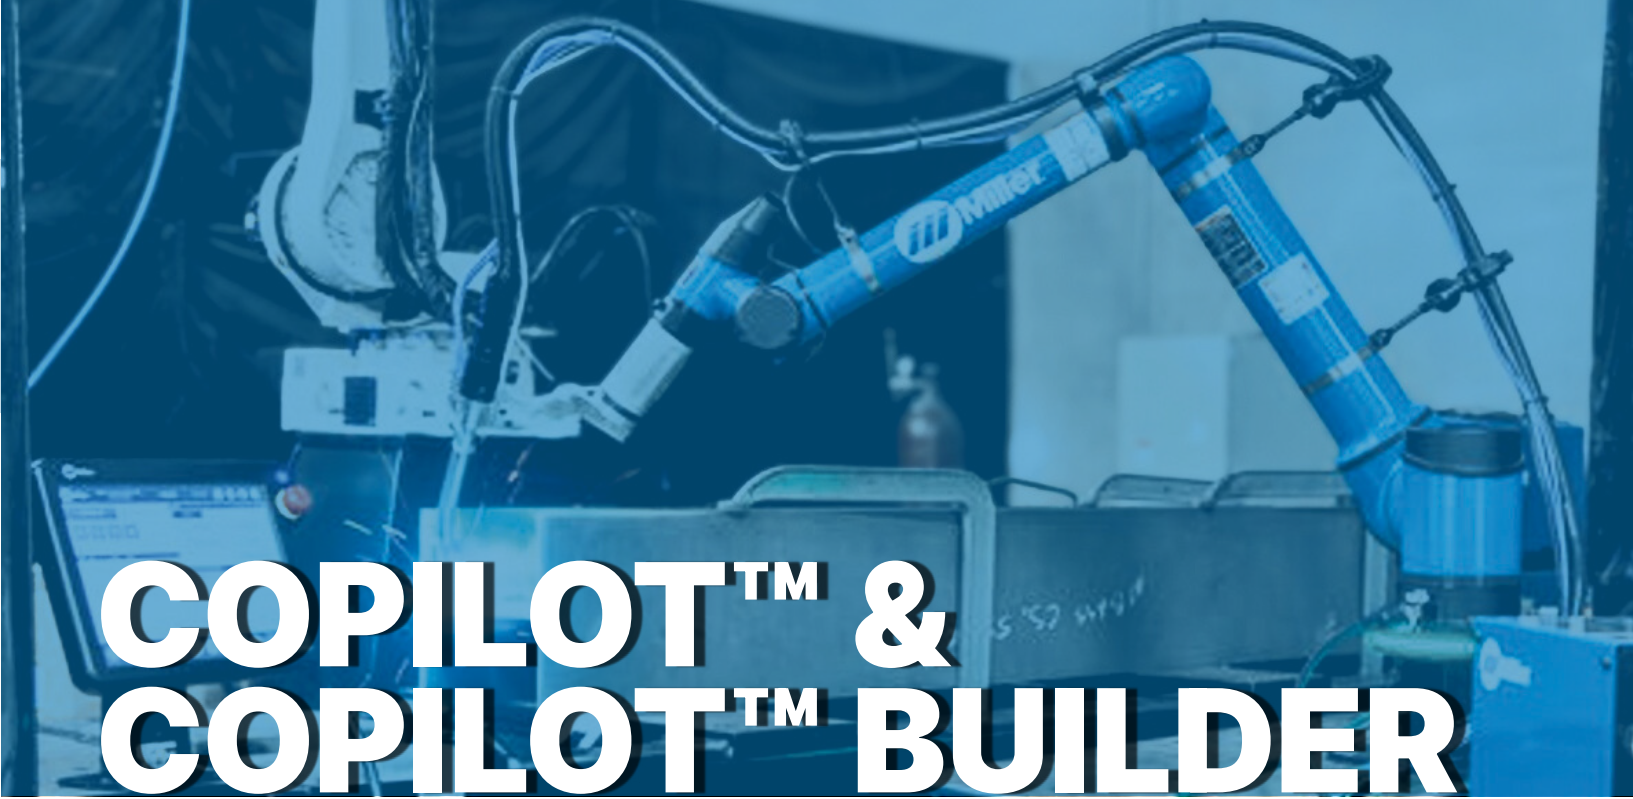

The PROSTAR™ Lancer Cobot delivers industrial-grade welding and cutting automation in a collaborative, easy-to-use, and cost-effective package—making advanced robotics accessible to fabricators & manufacturers of all sizes.

It combines Linde’s industrial gas expertise and leading OEM welding equipment manufacturers with the latest in collaborative robot technology to solve three of the biggest challenges in today:

- Skilled labour shortages
- Rising production costs
- Demand for consistent, high-quality output

Part Number	Description	Price
LC350AC-100	COBOT 350 AMP Air Cooled	\$135,000.00
LC500WC-100	COBOT 500 AMP Water Cooled	\$140,000.00

MIG Mix Gold is perfect for automated MIG welding applications to maximize productivity

COPILOT™ & COPILOT™ BUILDER™

Copilot™ and Copilot™ Builder™ make it easy for operators of any skill level to get started with robotic welding, offering intuitive use and advanced capabilities. Learn which Copilot system is right for you.

Operational benefits include:

- Touch sensing
- Seam tracking
- AccuGuide™ Precision Joystick
- Multipass software
- Intellisense™ Weld Settings Assistant

DNE Laser

DNE, a proud subsidiary of the Bystronic Group is recognized for delivering cost-effective fiber laser cutting systems that bring high-precision performance at a lower cost than premium brands. With strong appeal to small and mid-tier manufacturers, DNE provides an affordable entry point into advanced fiber laser technology

Fiber Laser Cutting Systems

D-Power

Engineered to deliver high-speed precision at a price point that makes advanced technology accessible to every manufacturer. Built with a rigid machine frame for stability, the D-Power integrates a high-efficiency fiber laser source ranging from 2kW to 6kW, ensuring clean, consistent cuts across stainless steel, aluminum, and mild steel.

D-Soar

The D-Soar is built for manufacturers who demand ultra-fast throughput without sacrificing precision. Featuring fiber laser sources up to 12kW, the D-Soar achieves cutting speeds exceeding 150 m/min with positioning accuracy of ±0.03 mm.

D-Giant

D-Giant is engineered for oversized sheet and plate cutting, giving manufacturers the ability to process formats up to 3 x 12 meters with ease. Its reinforced machine bed and dual-drive system guarantee stability and precision – even on thick materials. With fiber laser sources up to 20kW, the D-Giant cuts stainless steel and carbon steel plates with exceptional edge quality.

D-Tube Series

D-Tube specializes in cutting round, square, and complex profiles for industries such as automotive, aerospace, and construction. Equipped with a 3D cutting head and automatic chuck system, it handles diameters up to 350 mm with precision. With fiber laser sources up to 4kW, it ensures clean cuts and tight tolerances.

C-Bend Press Brake

The C-Bend brings intelligent CNC bending to modern production lines. Designed for accuracy and repeatability, it features servo-driven back gauges, multi-axis control, and intuitive programming software. The C-Bend handles complex bending sequences with ease, reducing setup time and operator intervention.

Custom Solutions

StormTower Ambient Air Cleaner

Diversitech’s StormTower transforms any workspace into a clean air zone. The system uses ambient style air cleaning technology to pull dirty air through high efficiency filters and recirculates it as clean, fresh air — no ductwork required. Create a safe, smoke free workspace with the Diversitech StormTower.

Benefits

- Continuously removes smoke, fumes, and dust
- Duct-free, compact footprint
- Reduces energy costs

Features

- High efficiency MERV 15 filtration
- Extended filter life
- Consistent airflow
- Flexible discharge
- Quiet operation

STARSOLVER® Productivity Enhancement Program

Boost Productivity with Linde’s Metfab Experts

Linde’s Metfab Productivity Specialists (MPS) are seasoned welding and cutting pros who know metal fabrication inside and out. Through our STARSOLVER® Program, they’ve helped customers cut costs and increase productivity — often with little or no capital investment. It all starts with a shop-floor review of your current welding or cutting operations.

Your STARSOLVER Evaluation May Include:

- | | |
|----------------------------------|----------------------------------|
| Gas usage & delivery | Welding & cutting processes |
| Weld size & travel speed | Equipment & automation potential |
| Wire type, feed rate & packaging | Operator productivity |
| Electrode efficiency | Power consumption |
