

R744 refrigerant carbon dioxide.

High quality and natural.

Introduction

R744 is a high purity carbon dioxide (CO₂) based refrigerant gas with a typical moisture content of less than 10 parts per million. The low moisture content enables the refrigerant to work more effectively and, more importantly, have less corrosive impact on your refrigeration systems.

Specifics/facts

CO₂ 4.0 (99,99%). Max 10 ppm H₂O, double valve (for liquid and gas withdrawal).

Product specification

Cylinder size in litres	Content in kg	Country	Item number
8	6	DK	117009
13,4	10	SE*/NO/ DK	108234
20	15	SE	117960
27	20	DK	116978
40	30	SE/LV/EE/LT/DK	110785
40	30	NO	107898
40	30	FI	367538
Sphere	325	DK	111349

* non-standard item.

Advantages of R744

- Low toxicity
- Non-flammability
- Zero ozone depletion potential
- Very low global warming potential (GWP=1)
- Excellent thermodynamic properties and low energy requirements
