

Medical Shut-off Valves. Product description.

Product description

For safety reasons and to allow maintenance the gas supply must be controlled by sections. Shut-off valves shall be fitted in every main line, riser, and branch line in the pipework system.

- Shut-off valves for all medical gases and instrumental air, nitrogen and argon. The shut-off valves are of the ball type with a straight cylindrical bore.
- Easy to operate - 90° turn between fully open and fully closed.
- Lockable in open or closed position.
- No maintenance - the ball valve does not need service, when necessary the whole valve is exchanged.
- Unions for brazing and flat sealing connections.(ordered separately)
- Reliable, easy to install and exchange.
- The valves are degreased and clean. They are provided with name plates in Swedish, Norwegian, Danish, Finnish, and Hungarian for each gas type.
- Before delivery each valve is individually leak tested.
- The ball is sealed with washer of PTFE. The stem is sealed with two silicon O-rings and teflon washer. The housing halves are sealed with an EPDM quality O-ring.

Technical data

Material valve housing	Nickel plated brass
Material ball	Chrome plated brass
Material stem	Nickel plated brass
Max working pressure	33 bar
Tighten proof	50 bar
Pressure rating	PN40
Regulatory status	Complies with medical devices directive 93/42/EEC. Complies with EN ISO 7396-1 (Central Gas Supply System).
Classification	Class IIa
CE-marking	CE0434

Recycling

The products shall be recycled according to local regulations.

The shut-off valve is delivered with two washers. To complete: order suitable unions. To assemble: Fit your connecting pipe into or outside* the union's connection pipe.

Article numbers

Shut-off valve incl 2 pcs washer
