

Making our world more productive

New laser, what's next?

Linde guides you through the process from A to Z.

A safe, reliable and efficient gas supply is one of the most important elements to consider when investing in a new laser machine or optimizing your existing laser operations. Linde will effectively support you through that process.

Gases developed for laser processing

High quality gases and gas mixtures developed for laser processing ensures optimum quality and performance in your production.

Flexible gas supply solutions

Get access to a comprehensive range of supply solutions from single cylinders and bundles, to fully automated bulk systems for trouble-free gas supply.

Resonator gases

Laser Helium, Laser Nitrogen and Laser CO₂, as well as LASERMIX® laser operating gas mixtures, provide a reliable and durable laser function.

Full range of equipment

We offer a complete range of equipment for gas supply. All regulators, manifolds and accessories are developed for laser processing.

Maintenance and technical service

We help you with design, installation and maintenance of your gas supply system according to authority regulations.

Development and knowledge sharing

We are active in developing all aspects of laser processing by co-operating with leading institutes and laser manufacturers. We strive to give you the best long-term solution for your laser operations.

What do our laser customers say?

"We have a long history with Linde going back to the installation of our first laser many years ago. I am happy with our cooperation. Besides the gases and gas supply installations, I appreciate the support in all aspects from Linde."

Bengt Fredriksson, Chairman of the Board. Dala Plåtteknik, Borlänge.

"I am very pleased with Linde as supplier of laser gases and services to our company. I especially appreciate the technical support. Quick response times and dedicated, competent Linde technicians are of great value for us."

Richard Jorvén, MD and Owner. Täby Plåtteknik AB.

"Linde's technical support and competence are important for us. The dedicated gas and hardware programs, as well as the knowledge around gas installations, are also much appreciated."

Emil Holmström, MD. SITAB Industriteknik, Sandviken.
