

Easier and safer everyday life with SECCURA[®] gas services

Automatic gas supply for bundles and cylinders

With SECCURA gas services for bundles and cylinders, Linde manages your entire gas supply. From checking gas levels to the final connection and leak detection. It couldn't be simpler and safer for you.

Linde takes care of gas supply and handling

SECCURA gas services reduce your worries about the availability of gas. With the help of SECCURA, you can reduce your costs and increase your convenience, as it allows you to use your resources where they are most needed. You will be free to focus on production.

This is how SECCURA works for bundles and cylinders

Via remote monitoring, we keep track of your gas levels. When the manifold has changed sides and one side is empty, Linde orders and delivers the gas that is needed. A specially trained driver takes care of disconnecting the empty and connecting the filled cylinders, as well as changing gaskets and leak detection.

Activity	Checking gas levels	> Place order	> Delivery to dock	X Transport	Connection	Change gaskets	Leak detection

What do our customers say?

"SECCURA works great and means we don't have to think about our gas supply. There is always gas. We free up time for other things through SECCURA. We don't have to keep track of the gas levels, take care of the bundles, move and connect. There are many other tasks besides the gas and through SECCURA we get time for everything. I really recommend SECCURA."

Patrik Tokalic, Northvolt Västerås, Sweden.

"We have had SECCURA on cylinder gases for many years and it works well, very well. It's handy and flexible as everything just flows and you don't have to keep track because Linde takes care of everything and we can focus on other things that need to be done. Thanks to SECCURA, a leak was discovered when Linde came back about an increased consumption of gas. We were able to check and discovered a leak at one of our machines. That was really good." Johan Karlsson, Gas manager, ZEPRO Z-lyften production, Bispgården, Sweden.
